About us and our program

DT Infrastructure is a trusted provider of engineering and construction solutions that unlock opportunities for our clients, communities and people.

Specialising in Defence, transport and infrastructure, we offer a unique synergy of local expertise in complex projects and the global perspective of our multinational parent company, Gamuda Berhad.

Our Graduate Program provides a variety of development opportunities so graduates can gain the technical, professional and personal skills they need to further their career within the ever-evolving infrastructure industry.

Our two-year program commences throughout the year, and includes a formal induction, core development training, webinars, an annual conference, networking opportunities and mentoring.

Key features of our program

- Focus on career planning and progression
- Clear learning pathway and learning culture
- Buddy and mentoring support
- Well-rounded development and on-the-job experiences
- Focus on wellbeing and financial coaching
- Flexible program structure.

Our purpose is to nurture and drive capability growth within a culture of teamwork while emphasising personal development so graduates are empowered to take ownership of their future.
